

# MiniVID WiFi Camera

The MiniVID WiFi 5MP camera is an incredible addition to our camera line. It can be mounted to nearly any brand or type of microscope with trinocular C-mount or inserted into one eyetube of a binocular head using the optional eyetube adapter. Connect to any iOS device (iPhone/iPad) or Android phone/tablet through the "UCAM Plus" app. Additionally, the MiniVID WiFi can be utilized with the included software for all PCs. The MiniVID WiFi has many different applications, but is best suited for teaching, training, and educating clients and students.

- **Take the microscope image** to the client, not the client to the microscope
- **Best of both:** High resolution *and* fast frame rates
- **Stream live images** to multiple devices at the same time

## SPECIFICATIONS

### Image Sensor

1/2" color CMOS chip – 5MP

### Frame Rate

Fast frame rates ensure smooth motion for fast moving specimens or live teaching.

When connecting to PC using USB cable, maximum frame rates are:

- 640x480@40fps;
- 2592x1944@15fps

When using WiFi, maximum frame rates are:

- 640x840@30fps;
- 2592x1944@5fps
